DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Appeal Brief, filed 18 September 2003, with respect to the rejection(s) of claim(s) 1-19 anticipated by Zscheile, Jr. have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Micali, U.S. Patent No. 4,944,009.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Micali, U.S. Patent No. 4,944,009. Referring to claims 1-3, and 10-12, Micali discloses a pseudo random sequence generator wherein random sequences are generated for encryption purposes (Abstract) by generating several pseudo random sequences (pseudo noise sequences) that are subsequently concatenated (Col. 6, lines 33-39). Figure 3 shows 4 random sequence generators, which meets the limitation of generated two or more pseudo random noise sequence generators.

Allowable Subject Matter

4. Claims 4-9, 13-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2132

The following is a statement of reasons for the indication of allowable subject matter:
The prior art does not disclose concatenation at arbitrary positions within the pseudo random sequences or synchronization of the pseudo noise generators to a reference clock.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin E Lanier whose telephone number is 703-305-7684. The examiner can normally be reached on M-Th 7:30am-5:00pm, F 7:30am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on (703)305-1830. The fax phone number for the organization where this application or proceeding is assigned is 703-746-7239.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
